

Maximise Your Energy Savings

With an **Energy Audit Investigation**

An Energy Audit Investigation is a diagnostic tool used to identify the most cost-effective ways to use less energy & keep more money in your business.

Every site uses electricity differently, which is why we believe applying a one-size-fits-all solution is a stab in the dark approach to reducing your energy costs.

An **Energy Audit Investigation** will:

Identify where and how much energy you're wasting.

Help you sort through the confusion and show you the best course of action for your site's needs.

Give you a tailored strategy for energy saving showing you the most viable solutions.

Provide clear, non-sales-driven information in a report that every member of the board can easily understand so that you can make informed decisions.

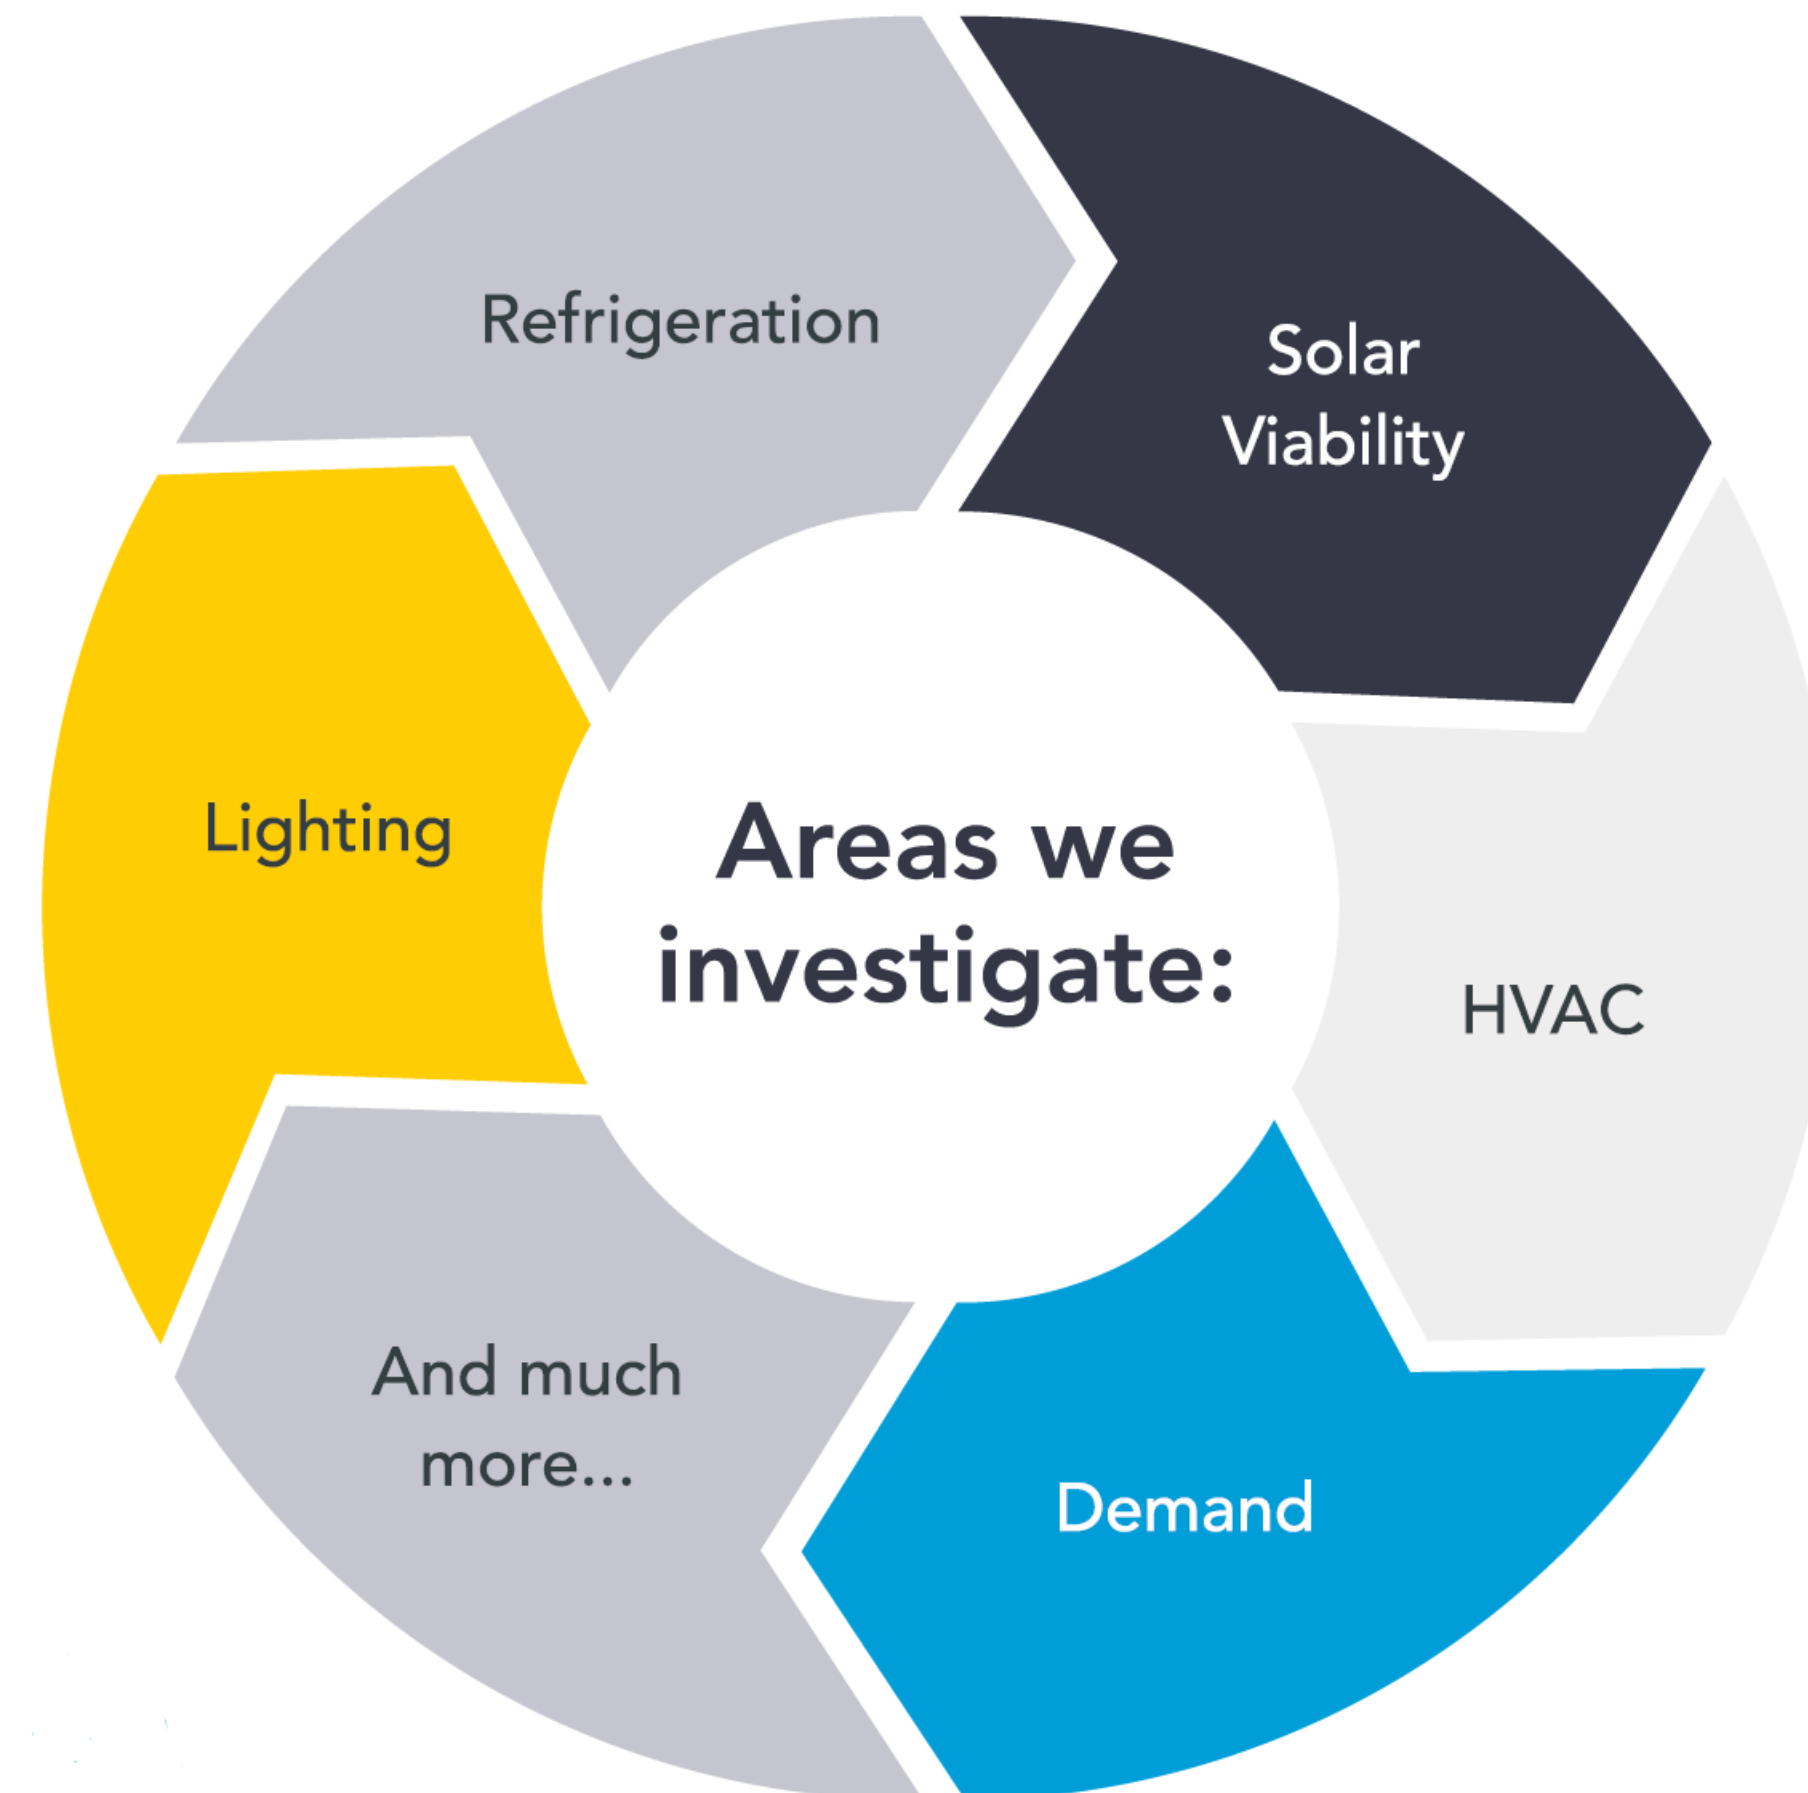

Help you avoid investing in the wrong solution.

Areas We Typically Investigate

We look at a range of areas to identify inefficiencies and determine the viability of applying energy efficiency solutions.

We carry out a comprehensive Electrical Energy Audit Investigation in accordance with the *AS/NZS 3598 – Level 2 Energy System Audits and Assessments* to ensure accuracy and integrity in the information we provide.

Energy Audit Investigation Process

Next Steps

Getting started with an Audit Investigation is easy:

- Click [HERE](#) to complete the Authority Form & to upload your power bills and other information we require

We'll make a time to visit the site to:

- Determine the length of time required to audit the site
- Better understand your needs

- We'll provide you with a quote to conduct an Energy Audit Investigation & a scope of works
- The cost of an Audit is based on the number of hours required to audit the site

- 50% of the Audit Fee is required to get started
- We'll then arrange a suitable time with you to carry out the onsite portion of the investigation

About Us

Electrical Energy Savers helps households and businesses find and implement the strategies they need to reduce their electricity costs and carbon emissions.

By partnering together, we empower you to make better-informed decisions in line with your goals and help you avoid the confusion, sales gimmicks and frustration of working it all out on your own.

Founded in 2012, we, along with our team, share a passion for thinking outside the box and educating people on the benefits energy efficiency can provide.

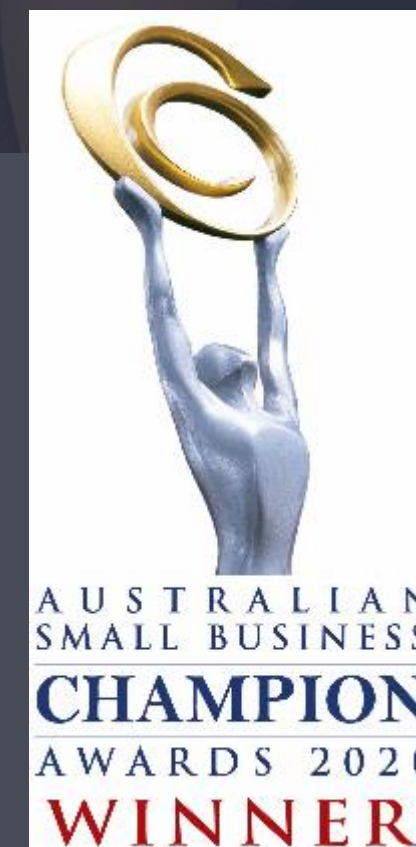

As Energy Efficiency Consultants, we remain committed to researching the highest quality solutions on the market and have gained State and National recognition for our work along the way.

Qualifications

- Licensed Electrician
- CEC Accredited Designer & Installer (solar)
- CEC Accredited Designer & Installer (battery systems)
- Cert. IV Energy Efficiency & Assessment

Anita & Michael

Industry Award Winners for Energy Efficiency Projects
